

# GOP Reliability Standards Program

Online Training

As a GOP, how do you make sure your employees understand the Standards that apply to your entity? Do they know why it is critical for them to document compliance? To help you ensure your employees know this information, SOS has developed a GOP Reliability Standards training program built around your unique needs. This specialized training package will educate your employees about the Standards applicable to your registration.

## The GOP Reliability Standards Program contains training for the following Standards:

- |           |           |           |           |
|-----------|-----------|-----------|-----------|
| · BAL-005 | · CIP-007 | · COM-002 | · TOP-003 |
| · CIP-002 | · CIP-008 | · EOP-004 | · TOP-006 |
| · CIP-003 | · CIP-009 | · EOP-005 | · VAR-001 |
| · CIP-004 | · CIP-010 | · IRO-010 | · VAR-002 |
| · CIP-005 | · CIP-011 | · TOP-001 |           |
| · CIP-006 | · COM-001 | · TOP-002 |           |

## Two additional lessons are also included:

- Reliability and Functional Entities – giving an overview of the roles, relationships, and responsibilities of FERC, NERC, the Regional Reliability Organizations, and the Entities
- FERC Standards of Conduct – educating students on how employees in the transmission and marketing areas of a public utility or interstate natural gas pipeline should apply the Standards in day-to-day activities

To make your training even more effective, the lessons can be customized to include your company policies and procedures. Using this Standards training as a base, you can add a lesson containing your specific company information – ensuring your employees not only understand the Standards you must comply with, but can tie back your company information to ensure compliance is documented. Call your account manager for more information and pricing on our custom training options.
